

ExpressCard to PC Card Adapter

Model
158015

Install and use PC cards with ExpressCard notebook computers.

Most new notebook computers today are equipped with smaller, faster ExpressCard slots, making larger but fully functional PC (PCMCIA) cards obsolete. The MANHATTAN® ExpressCard to PC Card Adapter helps new notebook computer owners with existing PC cards transition to the latest technology without great expense.

Get More from PC Cards

Instead of abandoning or replacing PC cards with newer, more expensive ExpressCard formats, the MANHATTAN ExpressCard to PC Card Adapter easily fits in any ExpressCard/34 or ExpressCard/54 slot to extend the life of Type I and Type II PC cards. For the price of most new ExpressCards, it helps save money and realize the full value of existing Ethernet, expansion, controller and other PC cards. The MANHATTAN ExpressCard to PC Card Adapter can quickly put an idle PC card back into service and a notebook computer back to work should an ExpressCard fail. It's small enough to fit in almost any tool kit, so technicians also find it a practical and efficient method for testing legacy hardware.

Easy to Install

Its Plug and Play installation and hot-swappable capabilities make the MANHATTAN ExpressCard to PC Card Adapter a versatile and useful accessory for Windows notebook computers.

Lifetime Warranty

Strict manufacturing standards ensure the highest quality in all MANHATTAN products. All items carry a full Lifetime Warranty — the strongest quality commitment anyone can make.

Model
158015

Features

- Provides a practical solution for using PC cards with an ExpressCard-equipped notebook computer
- Helps keep PC cards in service longer to deter costly replacement
- Easily share PC cards — special cables, connectors or power supplies not required
- Fits PCI ExpressCard/34 and ExpressCard/54 buses
- Plug and Play installation; hot-swappable — Windows compatible
- Lifetime Warranty
