HARDWARE INSTALLATION

Before installing the card, note the position of the available USB ports. The internal port, depicted as UJ5, also operates as external port UJ1. If internal port UJ5 is connected, UJ1 is not operational.

1. Turn off your computer.
2. Unplug the power cord and remove your computer's cover.
3. Remove the slot bracket from an available PCI slot.
4. To install the card, carefully align the card's bus connector with the selected PCI slot on the motherboard. Push the board down firmly.
5. Replace the slot bracket's holding screw to secure the card.
6. Replace the computer cover and reconnect the power cord.

DRIVER INSTALLATION

Windows 2000/XP automatically detects and installs the correct driver for the card. Ensure that you have the latest Service Pack installed: SP1 or later for Windows XP; SP4 or later for Windows 2000.

Windows Server 2003/Vista has built-in driver support for this controller. Just install the board and Windows automatically detects and installs the correct drivers for it. No additional driver is necessary.

Verify Windows Driver Installation

1. Right-click “My Computer”; click “Manage”; click “Device Manager.”
2. Double-click “Universal Serial Bus Controllers” to confirm installation with the following display.
 - USB Root Hub (USB 2.0 Root Hub in Windows 2000)
 - USB Root Hub
 - USB Root Hub
 - VIA Rev 5 or later USB Universal Host Controller (VIA USB Universal Host Controller in Windows 2000)
