# USB LINE EXTENDER REFERENCE GUIDE

MODEL 179300

Thank you for purchasing the MANHATTAN® USB Line Extender, Model 179300.

Conveniently bridging the distance between a USB device and a PC host without signal loss, the extender's local and remote units use a Cat5e network cable (not included) to connect, process and repeat USB signals — and can also be used separately to customize cables up to 60 m (196 ft.).

- *Embedded transceivers with UNIQUE UIC 4102 chipsets enhance signal and prevent signal loss*
- *Bus-powered, it requires no external power supply**
- *Lifetime Warranty*

* If using cable longer than 60 m (approx. 200 ft.) with a high-power device (e.g., a printer), connecting to an external power adapter is required.
