USB Internet Radio

Model
179997

Receive and record radio broadcasts on a PC.

With Internet access and a USB port, the MANHATTAN® USB Internet Radio delivers thousands of radio stations – 14,000 and more – from around the world to a desktop or notebook computer. Unlike some popular media players and Web-based entertainment sources, MANHATTAN USB Internet Radio allows listeners to instantly connect, hear and enjoy favorite sports, talk, music and news broadcasts from almost anywhere without subscriptions, use restrictions or costly upgrades.

Easy to Enjoy
Insert the MANHATTAN USB Internet Radio into a USB port to activate its multi-function onscreen control panel with search, sort, audio controls and settings. Choose from seven auto-play options to start selected broadcasts without delay or locate stations using a built-in keyword search or Top 10 genre and region lists, or explore comprehensive, updated station genre and region lists. Enter personal station ratings to influence Top 10 lists, contribute to trends and share opinions with other listeners. Save and add favorite stations and easily capture content to share and replay with convenient, one-touch recording.

Simple to Install
Unlike stand-alone, stationary Internet radio devices, the MANHATTAN USB Internet Radio is compact and lightweight, and easily packs into any notebook computer case for travel. Its Plug and Play capability, Windows compatibility and bus-powered design quickly connect without antennas, batteries, external power supplies, cables or software.

Lifetime Warranty
Strict manufacturing standards ensure the highest quality in all MANHATTAN products. All items carry a full Lifetime Warranty — the strongest quality commitment anyone can make.

Model
179997
