

USB FLEX LIGHT QUICK INSTALL GUIDE MODEL 438858

Thank you for your purchase of this MANHATTAN® USB Flex Light, Model 438858. Ideal for use in darkened meeting rooms, airplane cabins, editing/production suites and other low-light environments, it's also a perfect match for notebook computers that don't have built-in lighting or backlit keyboards.

The bus-powered MANHATTAN USB Flex Light easily installs into any USB port or desktop/keyboard hub.

The flexible gooseneck mount properly directs the beam to help limit eyestrain and avoid distracting others working nearby.

A bulb-free, twin-LED design featuring an estimated life of 100,000 hours (using less than 90 seconds per hour of battery charge) provides reliable service without an external power supply or cords.
